The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Howard et al. (6,096,048). Howard et al. disclose open ended frame 3 having first and second arms, maxillary holding device 5, marker attachment device (at 9) having a plurality of marker attachment points 45 that receive fiducial markers 31, wherein at least two of marker attachment points are inherently configured to receive fiducial markers 31 in different orientations. For example, one marker attachment point is inherently configured to receive a receive a fiducial

marker 31 in the orientation shown in the figures while another marker attachment point is inherently configured to receive a fiducial marker 31 in the opposite orientation (by being screwed into attachment point 45 in the opposite direction). Alternatively, it would have been obvious that another marker attachment point is inherently configured to receive fiducial marker 31 in the opposite orientation for this reason.
